

KIM JOHN TUÑACAO

Junior Technology / Software QA | Networking & AI-Assisted Development

Philippines | tuncaokimjohn@gmail.com | [Portfolio](#) | [GitHub](#)

PROFESSIONAL PROFILE

Technically experienced career changer combining marine engineering troubleshooting with hands-on web apps, QA processes, AI-assisted development and foundational networking training. Builds prototypes, tests user flows, records problems and reviews AI outputs rather than assuming successful execution.

TECHNICAL & PROFESSIONAL SKILLS

Programming / platforms

HTML, CSS, JavaScript fundamentals, Python exposure, Linux, GitHub, Godot, Android/PWA projects.

Networking / security learning

IPv4/IPv6, OSI/TCP-IP concepts, Cisco Packet Tracer, Linux fundamentals; Junior Cybersecurity Analyst pathway in progress.

QA / AI workflows

Test cases, regression review, bug reproduction, architecture planning, ChatGPT, Codex and Claude Code experimentation.

SELECTED PROJECTS

Project NERO | AI assistant / engineering prototype

Designed role-separated AI components and approval-driven development workflow; prioritized verified operations and structured tests.

SchoolPulse | Role-based school portal

Translated operational requirements into role-based pilot workflows, test reviews and staged candidate qualification.

VELO | Godot autorunner prototype

Directed and playtested visual, collision, road-transition and game interface iterations with AI-assisted coding.

SmartHouse Budget | Mobile finance PWA

Designed everyday finance, bill protection, shopping-list and household workflows; validated app screens with test/demo data.

PROFESSIONAL EXPERIENCE

Motorman / Marine Engineering Operations | 2022–2026, multiple vessels

- Performed routine machinery watchkeeping, monitoring, preventive maintenance and operational troubleshooting in international maritime environments.
- Followed safety procedures, documented technical work and coordinated with engineering teams under time-sensitive conditions.

Engine Cadet | 2018–2019

- Supported engine-room operations and machinery inspection under supervision.

CISCO NETWORKING ACADEMY | COMPLETED COURSES

Networking Basics (13 Jul 2026) • Introduction to Cybersecurity (23 May 2026) • Getting Started with Cisco Packet Tracer (25 May 2026)

EDUCATION

Marine Engineering studies, Technological Institute of the Philippines, Manila (2014–2017).

High School Diploma, La Concepcion College, Bulacan (2014).
